Healthy **Volunteers Needed!**

for Research Study Sickle Cell Disease

We are looking to analyze the differences on blood cells between healthy volunteers and sickle cell disease samples to better understand the factors leading to development of sickle cell disease crisis and the possibility of predicting crisis with magnet-based devices to better care for patients with sickle cell disease.

Healthy volunteers

18 years or older

Minimum weight 110 pounds

When and Where: One 15-30-minute scheduled visit at the TTUHSC Clinical Research Institute

What will happen: 3 tablespoon of blood will be collected

Led by Dr. Lukman Tijani, and Jennifer Gomez, PhD Contact CRI for more information (806) 543-8994;
