

# Global Health Lecture Series

**Importance of Global Comparative Health: Key Concerns and Lessons for Healthcare Delivery in the United States**

featuring

**Dr. Richard G. Greenhill, DHA, MBA, MSc, FACHE Assistant  
Program Director BSHM/Assistant Professor**

**Wednesday, February 12**

**Noon**

**ACB 120**

Zoom: <https://ttuhsc.zoom.us/j/2793639559>

Dr. Greenhill is an Assistant Professor with 27 years of experience across the continuum of health services delivery. He has held various roles in executive leadership in US healthcare systems, and has expertise in global health systems. His global health credentials include applied research at the World Health Organization as well as at the health ministry-level in Belize, Sweden, Estonia, and Wales. In addition, he recently completed a post-doctoral Multilateral Diplomacy Immersion Program at the United Nations Office Geneva (UNOG), *Palais des Nations* in Switzerland.

The forces of globalization and international trade have reduced the time and distance between nations and therefore disease management. Trade pacts like the recent United States-Mexico-Canada Agreement (USMCA) underscore a need for US health executives and clinicians to become familiar with global health trends, lessons learned, and subsequent business and clinical impact. This lecture will discuss key topic areas related to global health such as innovations, workforce migration, and OneHealth.

**Free lunch will be provided to the first 50 attendees (*Lubbock campus only*).  
This event is free & open to the public. No RSVP is necessary.**

**For more information about the Global Health Lecture Series, contact the Office of Global Health at  
806-743-2901 or [globalhealth@ttuhsc.edu](mailto:globalhealth@ttuhsc.edu).**
