Comments: This table includes the number of newly enrolled students plus those re-entering from a different cohort. Attrition rate calculates the number of students from the entering class who did not complete the program due to dismissal plus the number of students from the entering class who left their cohort due to deceleration or personal leave of absence. The program did not admit more students than the maximum entering class size. Returning students account for the number exceeding maximum class size.

*Attrition rate calculation: Number of students who attritted from cohort (decelerated + withdrawals + dismissals) divided by the (entering class size + number joining class cohort).

**Graduation rate calculation: Number of cohort graduates divided by the (entering class size + number joining class cohort).
