Scoring key:

Scoring is for the whole group behavior based on dialogue for a complete question. Scoring is most accurate when the mentor helps to summarize. Scoring should be documented before beginning next question to avoid carry over between questions. Microlectures are extensions of explanations by the mentor that go beyond the answer choice under discussion and are approximately 5 minutes in length. Microlectures will be less frequent with inexperienced mentors but this is not a problem.

Degree of Engagement (DE):

1. Individual response – student gives direct answer, minimal follow up
2. Several responding – two or more add to the response
3. Full engagement – most or entire group engages in dialogue

Depth of Integration (DI):

1. Brief direct answer – factual answer
2. Complete direct answer – factual answer with rationale
3. Integrative probing – implications of factual answer

Micro Lecture (ML):

Yes/No
